

## JNCIA-FWV: Juniper Networks Firewall/VPN Certification

The three day JNCIA-FWV is the first course in the FWV Certification curriculum. The instructor-led course focuses on configuration of the Juniper Networks Firewall/VPN products in a variety of situations, including basic administrative access, routing, firewall policies and policy options, attack prevention features, address translation, and VPN implementations.

Students will have the opportunity to configure NetScreen devices in a variety of lab scenarios.

This course is part of the Juniper Networks **J-Partner Certification** program and prepares students for the **JNCIA-FWV Certification** program. JNCIA-FWV exam topics are based on the content of this course. This course is intended for network engineers, support personnel, reseller support, and others responsible for implementing NetScreen products utilizing the advanced features covered in this class.

By the end of this course, students will be able to describe the NetScreen packet handling process. Students will also be able to configure a wide range of features.

Specific topics include:

- Juniper Networks Security Concepts
- Security Architecture
- Transparent Mode and Layer 2 Operations
- Layer 3 Operations/Configuration
- Policy Options and Configuration
- Attack Prevention
- Address Translation Options
- VPN Concepts
- Route-Based VPNs
- Policy-based VPNs
- Netscreen Remote Client

**Prerequisites:** This course assumes that students have basic networking knowledge and experience in the following areas:

- Ethernet
- Transparent Bridging
- TCP/IP Operations
- IP Addressing
- Routing

**Duration:** 3 days (This course is also available in a 4-day format)

**Cost:** \$2495. DWWTC is also able to deliver this class on customer premises at a rate commensurate with the number of students in attendance. *All Juniper courses use authorized Juniper Networks® course materials.*
